Mr. Dennis L. Rhine
Vice President, General Manager
Interpace Industries, Incorporated
P. O. Box 12118
Ogden, Utah 84412

Dear Mr. Rhine:

Re: Notice of Intention to Commence Small Mining Operations, Henefer Red Clay #37 & #38 Project, S/043/014, Summit County, Utah

Thank you for your Notice of Intention to Commence Small Mining Operations, received by the Division on August 18, 1993. The application for the proposed Henefer Red Clay #37 & #38 Project, located in Section 28, T4N, R4E, SLBM, Summit County, Utah is complete and no additional information is required at this time.

Your notice indicates that you will be mining in a previously disturbed area. Please document the extent of the existing disturbance prior to your project. I suggest you use photographs and/or a sketch of the areas on a map as documentation. A site inspection would be best if scheduling allows.

From your legal description, the proposed operations may involve lands having split surface and mineral ownership. I suggest you contact the BLM to verify or disprove this issue.

For your reference, I have enclosed copies of our summarized rules regarding "Operation and Reclamation Practices", and the statutory penalty for failure to reclaim a minesite (SMO-1 and SMO-2).

Please give special consideration to item #10 of the "Operation and Reclamation Practices" (SMO-1). Stockpiling topsoil material prior to beginning your mining operation will help ensure successful revegetation efforts upon final reclamation of the minesite. If the area being mined is a solid rock outcrop, or if the land surface is very

rocky, then soil stockpiling is probably not possible. However, even the first few inches of undeveloped material is worth saving to aid in later revegetation efforts, and future regulatory release from reclamation requirements.

Should you wish to expand your operation beyond the five (5) acre limitation, please notify this office as soon as possible to discuss the necessary permitting requirements.

A Memorandum of Understanding (MOU) between this Division and the State Department of Environmental Quality (DEQ) requires us to notify them upon receipt of a mining application. If you haven't already done so, you are advised to contact their office prior to starting your small mining operation to determine whether additional permits and/or approvals are required. We will forward a copy of this letter and your notice to the DEQ for their review. Their address and phone number is: Department of Environmental Quality, 288 North 1460 West, Salt Lake City, Utah, 84116, (801) 538-6146.

Thank you for your cooperation. When in the area, a member of the Division staff will examine the site. Best wishes with your mining operation.

Sincerely,

Anthony A. Gallegos
Reclamation Engineer
